Inforiver has solved a problem that has existed in the D&A industry for as long as it has existed – It enables both the distribution AND intake of business-critical information all in a single ecosystem. Allowing users to supply critical, human retained information and context while they are consuming BI content has allowed for the capture of new data that was previously inaccessible.

Aaron Glover

Senior Vice President, Workforce Management & Analytics

The user-friendliness of Inforiver made it easier for our teams to customize views, reducing reliance on IT to facilitate customization of reports. Inforiver helped us design reports that were done in Excel before, freeing time for analysis and reducing time for manual report preparation.

“Our experience with Inforiver has been very positive. We have been able to deploy solutions rapidly, at minimal cost, while greatly streamlining our cumbersome, Excel-based planning process. By incorporating the solution into Power BI, the immediate visibility during the cycle made possible by Inforiver has been a game-changer.
